ACM Reference Format:
Florian Hofer. 2018. Architecture, technologies and challenges for cyber-physical systems in Industry 4.0: A systematic mapping study - Reference List. In *ACM / IEEE International Symposium on Empirical Software Engineering and Measurement (ESEM) (ESEM '18), October 11–12, 2018, Oulu, Finland.* ACM, New York, NY, USA, 8 pages. https://doi.org/10.1145/3239235.3239242

Included papers:

[1–24, 26–28, 30–36, 38–46, 48, 49, 51–68, 70–75, 77–84, 86–106, 108–122, 124–126, 128–135, 137–144, 146–148, 150, 151, 155–157, 161, 162, 164, 165, 167–170, 172–174, 176–182, 184–186, 189–192, 194, 196–200, 202–205, 207–210, 212–216, 218–221, 223, 225–234, 236–248, 250–252, 254–261]

During this mapping study the following second and third level papers were identified. The list is longer than the initially presented related work list as some of these were encountered in successive iterations of search and/or snowballing.
Studies: [21, 25, 41, 44, 50, 107, 110, 124, 127, 135, 149, 155, 160, 163, 187, 193, 199, 202, 225, 235, 253]

At the same time, the following border-line papers were finally excluded. They were part of the paper population until the last phase and some further reading. For appropriate reproducibility, the mentioned papers are listed here.
Borderline Papers: [25, 29, 37, 47, 69, 76, 85, 104, 123, 136, 145, 152–154, 158, 159, 166, 171, 175, 183, 188, 195, 201, 206, 211, 217, 222, 224, 249]
